

Module

```
graph BT; A["projects.controllable<br/>_dialogue.controllable<br/>_seq2seq.modules.UnknownDropout"] --> B[Module];
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'Module'. Below it is a larger box containing three module names: 'projects.controllable', '\_dialogue.controllable', and '\_seq2seq.modules.UnknownDropout'. A blue arrow points from the bottom of this lower box up to the bottom of the 'Module' box, indicating that these three modules inherit from the 'Module' class.

projects.controllable  
\_dialogue.controllable  
\_seq2seq.modules.UnknownDropout
