

```
parlai.tasks.ubuntu.agents.  
UbuntuTeacherWithNegs.get
```

```
graph LR; A["parlai.tasks.ubuntu.agents.  
UbuntuTeacherWithNegs.get"] --> B["parlai.tasks.ubuntu.agents.  
UbuntuTeacherWithNegs.add  
_candidates"]
```

A diagram showing a call to the `get` method of the `UbuntuTeacherWithNegs` class, which returns an instance of the same class. The call is in a grey box on the left, and the instance is in a white box on the right, connected by a blue arrow.

```
parlai.tasks.ubuntu.agents.  
UbuntuTeacherWithNegs.add  
_candidates
```
